SUMMARY

Microsoft certified (PL-300) Data Analyst currently working within ACT Government, with hands-on experience developing and maintaining Power BI reports with a strong foundation in data-driven decision-making, digital innovation, and community-focused service. Experienced in developing and maintaining Power BI dashboards, reports and visualisations, and in validating data using SQL to support high data-quality standards. Skilled at interpreting data to identify trends and issues, presenting insights in clear and accessible ways for non-technical audiences, and producing reporting that informs operational and strategic decision making. Collaborates with stakeholders to clarify data requirements, works within Agile delivery, and handles sensitive information with care and discretion.

TECHNICAL SKILLS

- Data Analysis & Reporting: Power BI (DAX, dashboards, data modelling, semantic models), Excel.
- Querying & Data Validation: SQL (CTEs, joins, stored procedures, views); data cleansing, reconciliation and validation
- Databases & Pipelines: SQL Server, MySQL; ETL/ELT pipelines
- Programming: SQL, Python
- Cloud & Tools: Microsoft Azure, Microsoft Office Suite, Jira, TRIM, Azure Devops
- Frameworks & Practice: Agile delivery; data quality & accuracy; stakeholder engagement; secure handling of sensitive information

| • Microsoft Power BI Data Analyst Associate (PL-300) | Apr 2026 |
| • Automate Tasks and Processes with Jira – Coursera | May 2025 |
| • SQL (Advanced) by Hacker Rank | May 2025 |

WORK EXPERIENCE

Data Analyst (ASO5)

May 2026–Present

ACT Government, CSD, Data Insights and Analytics

- Develop, run, and maintain data reports, analytics dashboards, and data visualisations using Power BI, Python, and SQL, supporting evidence-based decision making across the directorate.
- Interpret analytical results to identify data quality issues, locate and resolve code problems, and ensure ongoing integrity of reporting outputs.
- Drive improvements in data automation, process standardisation, and data integrity, contributing to a stronger data management framework.
- Collaborate with key stakeholders across business units to deliver enhanced CSD reporting aligned with organisational priorities and strategy.
- Work within an Agile project management framework, keeping the team and executive leadership informed of progress, risks, and delivery timelines.

- Handle sensitive and complex data in accordance with privacy obligations and legislative requirements to achieve business outcomes.

Customer Service Officer (ASO3)

Oct 2025–May 2026

ACT Government, CED, Access Canberra

- Navigated and maintained data across multiple digital platforms — including Salesforce, rego.act, Rego Help, SharePoint, and Q-Flow — ensuring transaction accuracy and data integrity across high-volume customer interactions.
- Queried and updated customer records across integrated government databases, applying data accuracy standards in compliance with the Territory Records Act 2002 and privacy obligations.
- Monitored and analysed real-time customer flow dashboards across multiple service centres to support operational decision-making, resource allocation, and queue management.
- Interpreted ACT Government regulatory requirements to assess applications and deliver accurate advice across in-person, phone, and written channels.
- Identified and escalated data inconsistencies within Rego Help, contributing formal feedback that led to content amendments — improving data accuracy for staff and customers.

Senior Mechanisation Officer

Apr 2021 – May 2022

Muktinath Krishi Company Limited, Kathmandu, Nepal

- Designed and deployed interactive dashboards (Power BI, Excel) analysing seasonal sales trends, leading to a 25% increase in machinery sales.
- Conducted ROI and performance analysis on irrigation and machinery projects, informing pricing and distribution strategy.
- Delivered 10+ data-supported presentations to farmers and regional managers, driving adoption of new tools and techniques.

PROJECTS

End-to-End Data Warehouse Development ([Github Link](#))

May 2025

- Built a Medallion Architecture-based data warehouse for ERP & CRM sources using SQL Server.
- Created ETL pipelines (batch & truncate-load), star schema (fact/dim tables), and automated stored procedures for business queries.
- Enabled self-service reporting with cleaned, validated datasets and user-facing SQL views.

Data Professional Survey Breakdown using Power BI ([Github Link](#))

Mar 2025

- Cleaned and transformed survey data; developed interactive Power BI dashboard showing KPIs across job roles, industries, and satisfaction metrics.
- Enabled filtering by demographics and role types to guide workforce planning insights.

EDUCATION

Canberra Institute of Technology

Diploma in Project Management

Canberra, Australia

2025 – Present

University of Canberra

Master of Data Science

Canberra, Australia

2022 – 2024
